Education

Pune Institute of Computer Technology, Pune.

CGPA: 9.26

B.E. in Information Technology

Aug 2023 – June 2027

Rashtriya Vidyalyaya Junior College, Chalisgaon.

Percentage: 77.00%

HSC (Maharashtra State Board)

Mar 2023

Tathyaheeb Samant Madhyamik Vidyalaya, Chalisgaon.

Percentage: 92.40%

SSC (Maharashtra State Board)

Mar 2021

Experience

Full-Stack Development Intern – PICT Pune

Feb 2026 – Apr 2026

- Took ownership of key modules during the development of **PathHire**, a Spring Boot-based application built on Monolithic Spring architecture, coordinating with team members across design and implementation phases.
- Overcame integration and debugging challenges under tight sprint deadlines, proactively identifying bottlenecks and driving solutions through structured problem-solving and code reviews.
- Contributed to developing and integrating RESTful APIs, ensuring seamless communication between all endpoints and improving the overall reliability and functionality of the application.

Projects

PathHire – Job Portal: *Spring Boot, Spring Security, JWT, Mysql, React*

GitHub

- Architected a secure backend with Spring Security and JWT based stateless authentication, BCrypt password hashing, and role-based access control for applicants and recruiters.
- Developed 25+ RESTful API endpoints with Spring Boot and Mysql, enabling job postings, multicriteria search, and realtime application status tracking.
- Implemented OTP based email verification via Spring Mail built a fully responsive React frontend using Redux Toolkit and JWT interceptors.
- Integrated secure user workflows and optimized frontend-backend communication to ensure reliable job application management and a seamless experience for applicants and recruiters.

AGV Fleet Optimization System: *Dijkstra's Algorithm, Priority Scheduling*

GitHub

- Optimized AGV payload delivery routing using Dijkstra's algorithm and priority scheduling for efficient planning.
- Implemented scheduling logic that reduced delivery time by 35% while resolving payload and collision constraints.
- Improved fleet coordination by allocating AGV tasks based on priority, route availability, payload constraints, and battery levels.

Metapic – AI Photo-Sharing Platform: *Spring Boot, FastAPI, InsightFace, MongoDB, React*

GitHub

- Architected a decoupled microservices platform integrating Spring Boot with a Python FastAPI AI service to enable fast, accurate facial-recognition-based photo retrieval.
- Engineered an AI pipeline using InsightFace to generate 512-dimensional facial embeddings, implementing Cosine Similarity matching across thousands of event photos.
- Secured the platform with JWT authentication, BCrypt hashing, and a custom rate limiter; integrated Cloudinary for CDN-based storage and SMTP-based OTP verification.

Technical Skills

Programming Languages: Java, C++, JavaScript(Basic), HTML, CSS.

Core Concepts: Database Management System, Object-Oriented Programming (OOP), Data Structures and Algorithms .

Frameworks & Technologies: Spring Boot, Microservices(Basic), REST APIs, Spring Security, JWT, React, Docker .

Databases & Tools: MySQL, JDBC, Git, GitHub.

Achievements

- Sports – Represented Maharashtra at the State Level in Softball.
- Finalist among 130+ teams as Team Lead – Cybage-Khushboo TechFest, Agriculture Domain, Cybage Software.
- State-level ECI Student Registration Award – Record-breaking new voter registrations.
- MHT-CET – Achieved 98.93 %ile, securing Rank 40 in the University Merit List.
